

ELBOW MANDREL ASSEMBLY FOR US SERIES

■ This new generation elbow mandrel assembly allows to position a US type machine on all types of elbows.

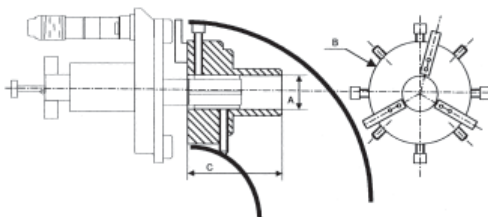

■ Its adjustment will be concentric thanks to the rules located around the system, and will allow to achieve a high quality weld preparation on all types of elbows and materials including stainless steel and other high nickel alloys

TECHNICAL SPECIFICATIONS

Set up time	2 minutes
Graduations of the rules	Length: 40 mm Graduation: 0.5 mm
Optional equipment	- Stainless steel screws - Stainless steel additional jaws
