

## TUBE AND FITTING SQUARING MACHINE TYPE SE 25

■ The portable machine SE 25 is specially designed for squaring in position the diameters from 2 mm to 25.4 mm O.D.

■ The tool holder plate equipped with 1 tool insert allows to cover the machining range without any adjustment.

■ The setup of the tube is carried out quickly through a stainless steel monobloc collet.

■ The machine features a graduated vernier which gives a high quality and accurate weld prep.

### TECHNICAL SPECIFICATIONS

Clamping capacity	From 2 mm O.D. to 25.4 mm O.D.
Machining capacity	From 2 mm O.D. to 25.4 mm O.D.
RPM	Offload: 0 to 1200 rpm
Weight	2.5 kg
Feed	Graduated manual feed 1 div = 0.1 mm
Feed stroke	10 mm
Drive	Cordless electric drive
Optional equipment	<ul style="list-style-type: none"> <li>- Right angle drive</li> <li>- Bench mounting provision</li> <li>- Machine on mains current</li> <li>- Dual clamping device</li> <li>- Beveling tool blocks</li> </ul>
