

TUBE AND FITTING SQUARING MACHINE TYPE SE 65

■ The portable machine SE 65 is specially designed for squaring in position the diameters from 12.7 mm to 60.3 mm O.D.

■ The tool holder plate equipped with 2 tool inserts allows to cover the machining range without any adjustment.

■ The setup of the tube is carried out quickly through a stainless steel monobloc collet.

■ The machine features a graduated vernier which gives a high quality and accurate weld prep.

TECHNICAL SPECIFICATIONS

Clamping capacity	From 12.7 mm O.D. to 60.3 mm O.D.
Machining capacity	From 12.7 mm O.D. to 60.3 mm O.D.
RPM	Off load: 0 to 1200 rpm
Weight	3.5 kg
Feed	Graduated manual feed 1 div = 0.1 mm
Feed stroke	10 mm
Drive	Cordless electric drive
Optional equipment	<ul style="list-style-type: none"> - Right angle drive - Bench mounting provision - Machine on mains current - Dual clamping device
